

Shiny Pepe – Whitepaper v1.0

Overview

Shiny Pepe (\$SHEPE) is a community-powered meme coin that blends the iconic cultural force of Pepe the Frog with the collectible excitement of shiny Pokémon. Designed for maximum virality, nostalgia, and blockchain-native momentum, Shiny Pepe is a decentralized experiment in meme-based value — where the vibe is the utility.

Mission

To create the most recognizable and engaging meme token of the next bull cycle — one that thrives through community, art, rarity, and decentralized trading tools like DEXTools and Dexscreener.

Tokenomics

8,192,000,000 (8.192B) \$SHEPE tokens in supply

Allocation	Percentage
Community	90%
Developer Wallet	5%

Why Shiny Pepe?

Because **Pepe is forever**. And when he's in his rarest shiny form, he's unstoppable.

This isn't a utility token pretending to be a meme — it's a meme token proud to be one, backed by real community fire and smart token mechanics. It's rare, nostalgic, and designed to ride the next wave of crypto mania.

Developer Transparency

- 10% of the total token supply is allocated to the developer for supporting the project long-term, including new exchanges and marketing.

- No hidden wallets, no stealth taxes, and no rug mechanics.
- Dev wallets will be **publicly viewable** and optionally vested via community vote.

📌 Final Note

\$SHEPE isn't just another frog coin. It's the shiny version. And that makes all the difference.

If you're ready to meme, trade, and ride something rare — welcome to the party.
